

With a partner, discuss the following questions in relation to the cells shown. Record observations.

- 1. Would the cell type be found in plants or animals?
- 2. What type of life functions might the cell be involved in?
- 3. Where in the organism (which body system) would the cell be found?
- 4. Why do cells from the same organism have such different functions?
- 5. What controls the functions of the different cells?
