System Interactions

Each image below depicts a process in action, and there are three body systems assigned to each picture. Look at each image and determine how these body systems interact to perform the process. Are there any other body systems that are involved but not included in the list of body systems? If so, write them in the space provided.

Circulatory,
Skeletal, Immune

Reproductive,
Endocrine,
Digestive

Integumentary,
Respiratory,
Circulatory

Nervous,
Circulatory,
Digestive

Determine which of the following statements is true.

1. Each body system works independently.
2. Organs of one body system may also be part of another body system.
3. Body systems interact constantly during states of change, growth, and repair.
